Side Channel Pumps

Self-priming, vertical type

DRV 0201 . . . 0401

Technical data

Capacity:	from 0,04 up to 2 m ³ /h
Delivery Head:	from 1,5 up to 27 m
Speed:	1450 rpm (max 1800 rpm) or
	2900 rpm (max. 3600 rpm)
Temperature:	max. 100° C
Casing pressure:	PN 6
Shaft sealing:	stuffing box or
	standard mechanical seal
Flange connections:	female British standard pipe thread (BSP)
Direction of rotation:	clockwise
	(when seen from the drive end)

Application

The Sterling SIHI DRV pump is a self-priming side channel pump capable of handling gas along with the medium and operates at a low noise level. The DRV pumps are used when clear or turbid liquids with an aggressive nature, in varied concentration and temperature ranges and without any abbrasive particles, are to be handled reliably and trouble free.

The performance curve steepness admits a precise regulation of the pressure with a small change in capacity.

Their applications cover the private, professional and industrial fields. For example:

- Domestic plants and agriculture for feeding spring well fountains and for garden and lawn cultivation.
- Trade and industry for handling coolants, for sampling and chlorination processes in waterworks, for running bottle washing machines or for circulating buffer water in big centrifugal pumps.
- Chemical and pharmaceutical industry for laboratory techniques or in the food industry.

Design

Single stage, vertical side channel pump with an open vane wheel impeller. The program comprises 3 sizes.

Because of the vertical arrangement of the unit, the floor space requirements are low. If the pipelines are of sufficient stability, the units of this series can even be suspended in the piping system without any foot support .

Construction

Casing pressure

Maximum 6 bar from 0 °C up to 100 °C.

Please observe

Technical rules and safety regulations: Casing pressure = inlet pressure + delivery head at minimum pump capacity.

Position of branches

Horizontal suction and delivery branch on opposite sides of the pump.

Flanges

The flanges are suited with female BSP thread (inches).

Bearings

Two grease lubricated ball bearings according to DIN 625 (design B) or two liquid surrounded sleeve bearings (design F). The first grease filling is done in the factory.

Direction of rotation

Clockwise, when looking at the pump from the drive end.

Shaft sealing

The shaft can be sealed by of a stuffing box or a standard mechanical seal.

Material design DRV

Dee	Componente	Material design				
Pos	Components	0A	0B N-GJL-250 X 6 G- C- K 20 Cr 13 Sed G-X 3 CrNiMoCuN 26 6 3 3 G-X 3	4B

1610	Cover	EN-G	X 6 CrNiMoTi 17 12 2			
1140	Casing			G-X6 CrNiMo 18 10		
1810	Foot		EN-GJL-250 coated			
2100	Shaft	X 20	X 5 CrNiMo 17 12 2			
2350	Vane wheel impeller	special brass, die-pressed	G-X 3 CrNiMoCuN 26 6 3 3	G-X 3 CrNiMoCuN 26 6 3 3		
3300	Bearing bracket		EN-GJL-250 coated			
0241	Bearing bush	EK	-			

Casing seal

The casing is sealed with a liquid sealing compound for material design 0A, 0B (Cast iron). The casing is sealed with soft Teflon for material design 4B (Stainless steel).

Drive / coupling

By electric motor, construction type DRV in Cast iron (0A, 0B): B14 of V18 construction type DRV in Stainless steel (4B): V1 of B5

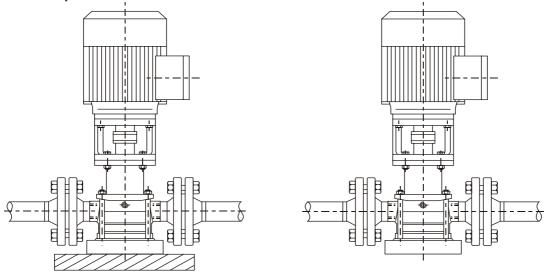

Alternating current is possible for material design 0A, 0B up to 0.25 kW.

Pump and motor are connected with each other by a sleeve type coupling for material design 0A, 0B. Pump and motor are connected with each other by a flexible coupling for material design 4B.

General comments

We refer to the series AKV for vertical side channel pumps offering higher performances. The technical documentation for this pump series will be readily supplied on request.

Installation example

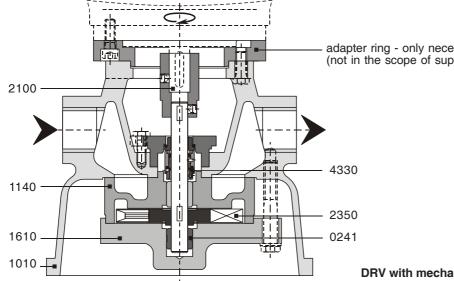

When the pipe lines are of sufficient stability, the DRV pump can also be suspended in the piping system without any foot support

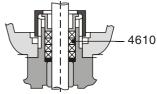

Sectional drawing and parts list DRV (typical)

DRV in Cast iron (design F / 0A, 0B)

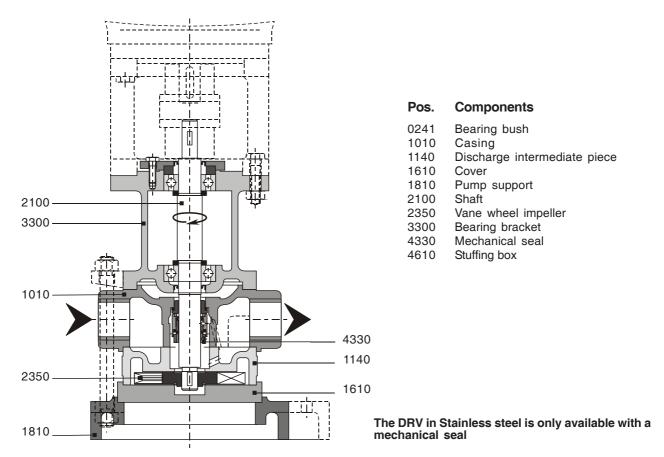

adapter ring - only necessary for a 0,37 kW motor (not in the scope of supply for a bare shaft pump)

DRV with mechanical seal or stuffing box

DRV in Stainless steel (design B / 4B)

All possible design combinations can be found in the delivery program

Performance graph DRV

General conditions

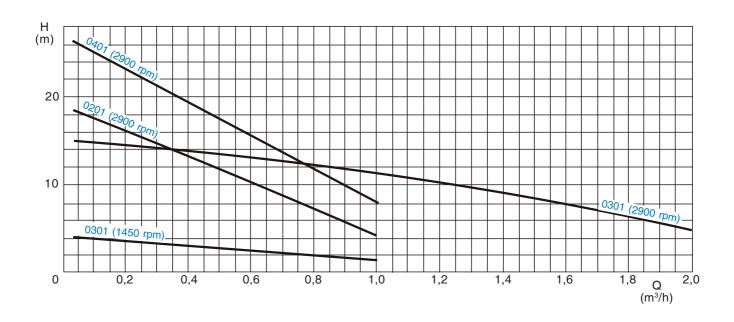

Liquid:	Water
Density:	1 kg/dm ³
Viscosity:	1 cŠt
Temperature:	20 °C
Atmospheric pressure:	1013 mbar

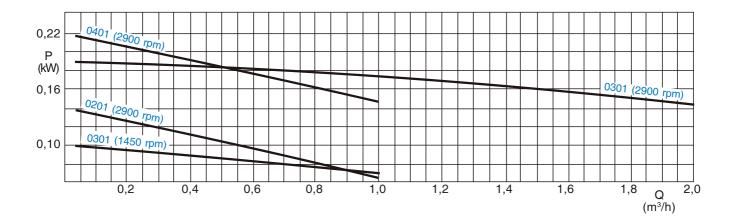

Characteristic tolerances

Capacity $\pm 10\%$ - Delivery head $\pm 10\%$ - Power + 10% For designs with a mechanical seal or casing seal of soft Teflon, the tolerance for the delivery head is extended by 2% each.

Measuring tolerance

According to ISO 5198

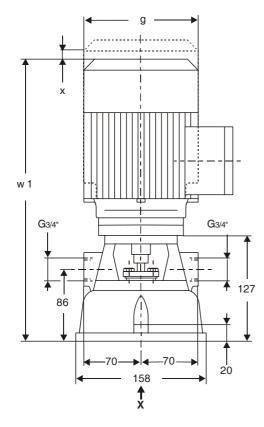

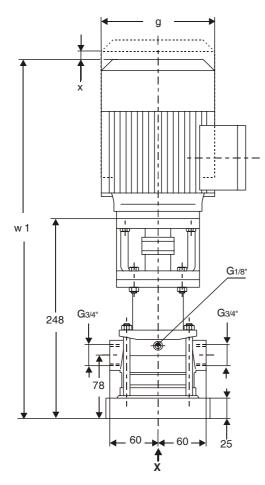

Dimension chart and Pump set drawing

DRV 0201, 0301, 0401 in Cast iron (0A, 0B)

Notes

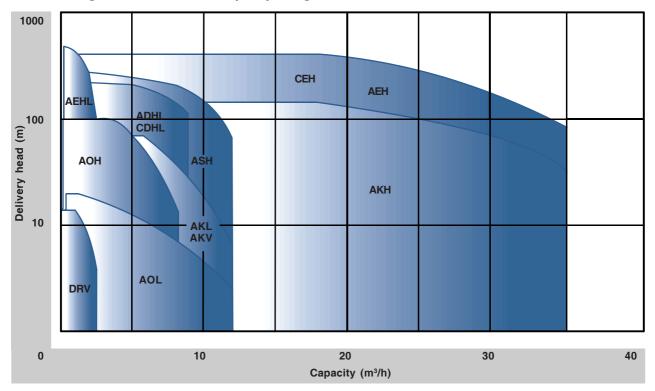

It is the policy of Sterling Fluid Systems to seek continually for ways to improve its products and the right is reserved to alter specifications at anytime without prior notice.

Sterling SIHI Side Channel pumps

Sterling Fluid Systems offers an extensive Side Channel pump range under its brand name Sterling SIHI. Sterling Fluid Systems has more than 80 years of experience in manufacturing, installation and support of Side Channel pumps. The Sterling SIHI Side Channel pumps can be found in a wide application range for the:

- Chemical market
- Pharmaceutical industry
- Petrochemical industry
- Food industry
- Ship yards
- LPG industry
- and many more ...

The Sterling SIHI Side Channel pump range

The benefits of the Sterling SIHI Side Channel pumps

- Self priming
- Gas handling
- High-resistant materials
- Performance curve characteristics
- High efficiency
- Low NPSH_B value
- Modular hydraulic system

The Sterling SIHI Side Channel pumps comply with the highest demands of our customers and are the best solution for the handling of liquid under critical physical conditions.
